

WeGuard Enterprise Sign Up - Device Enrolment Procedure via afw#weguard

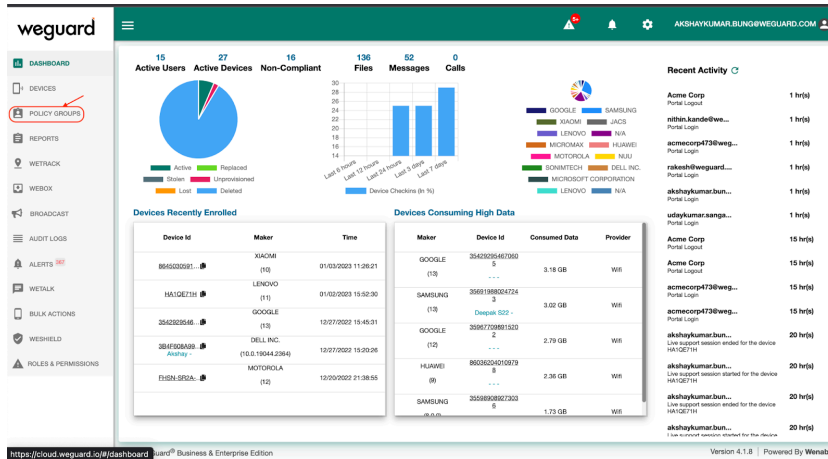

Hello and Welcome to WeGuard Enterprise Visual Knowledge-base Series.

In this KB article, We will explain how to enroll a device using 'afw#weguard' method.

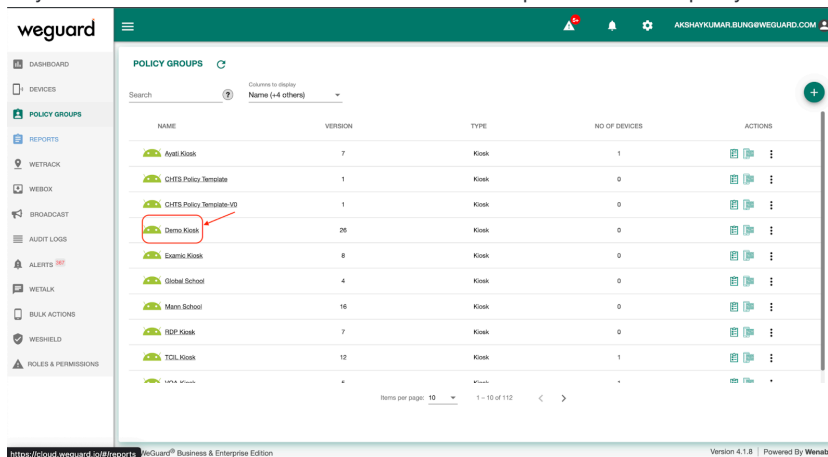

This Enrollment setup has 2 parts.

Part 1: Adding device to the policy on the WeGuard console.

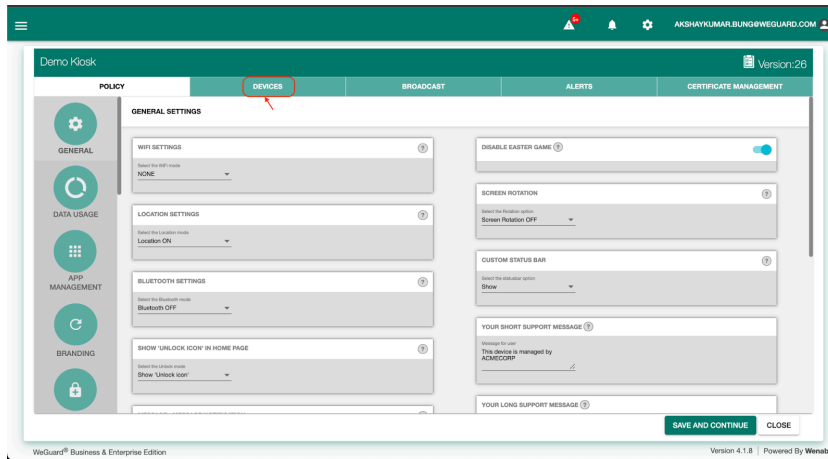

- Login to [WeGuard Console](#) with valid credentials.
- From the left navigation menu, click on "Policy Groups".

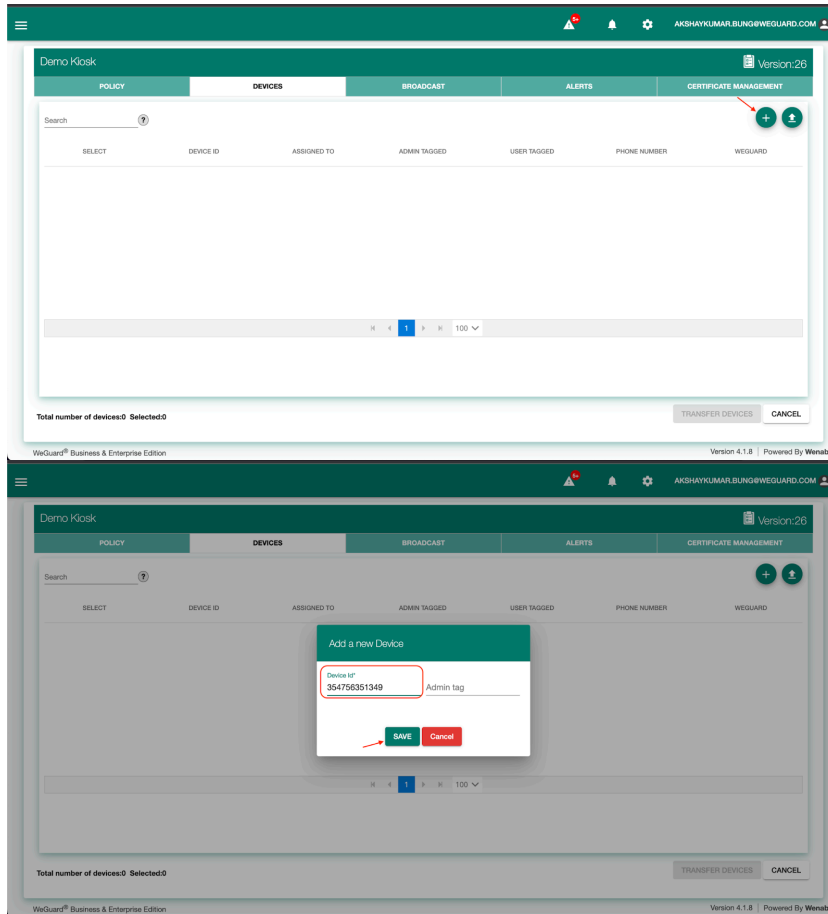

- Notice the list of default policies along with the policies you have created (if) to meet business needs.
- Now select the policy in which you want the device to be added. Here as an example 'Demo Kiosk' policy has been selected.

- Next click on the devices tab as shown below.

- Click on '+' on the top right of your screen and then enter the IMEI/Serial number in the Device ID field and click Save.

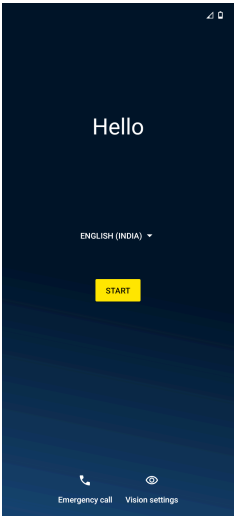

- Now the device has been added to the policy.

 Note: If the device is a used one, Please factory reset the device before we begin the setup.

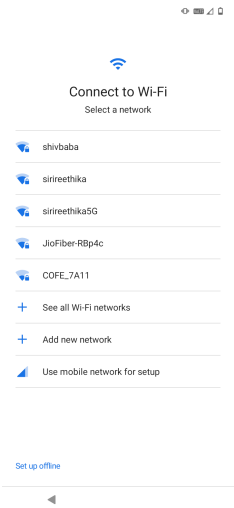

Part 2: Configuring the device.

 Note: The below setup pages may not be the same for all device and may vary based on OEMs.

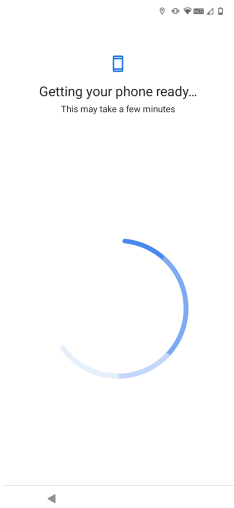

- Switch ON the device, and once you land on the Welcome Screen, Click 'Start'.

- Now select and connect to a stable Wifi network or mobile data and click next.

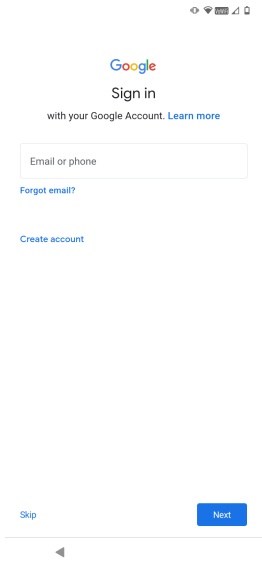

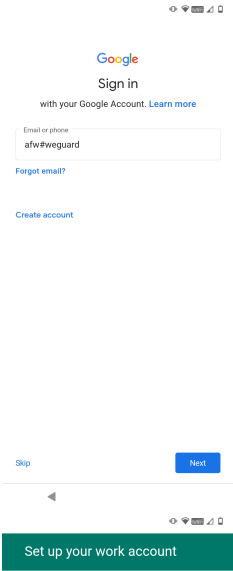

- Notice that the device checks for updates, let it continue.

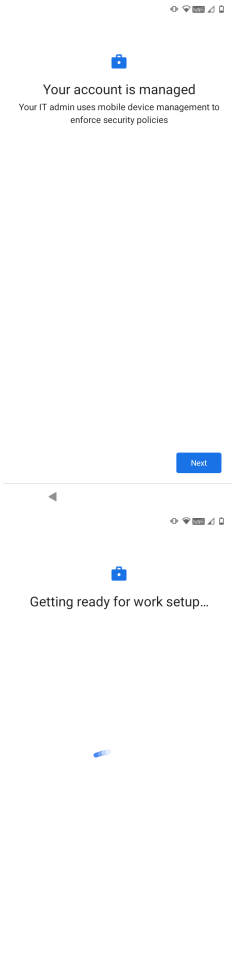

- After the checks are done, You'll land on the Gmail Sign-in page.
- Here please enter afw#weguard in the email field box as shown below and then click 'Next'.

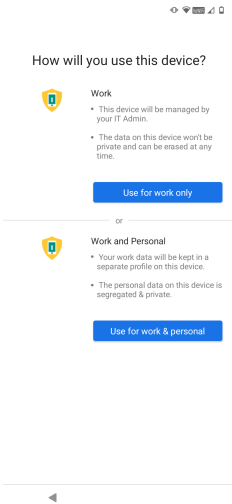

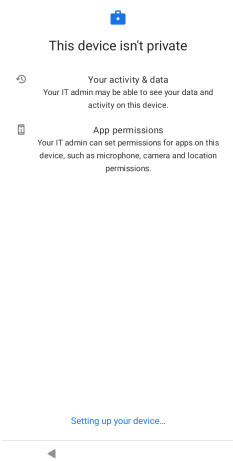

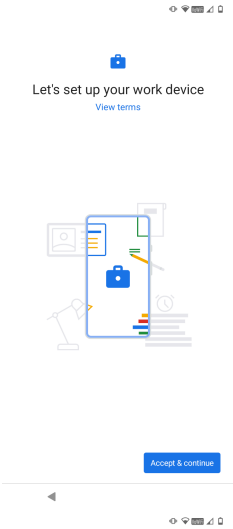

- After the above step, the device communicates with the google server and then WeGuard gets installed. Now click 'Next'.

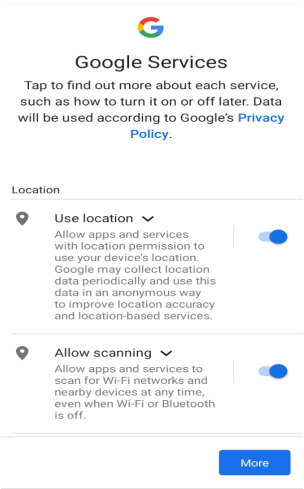

- Now based on the use case we can select any one of the below options. Since we have selected the Kiosk policy in part 1, We can select the 'I

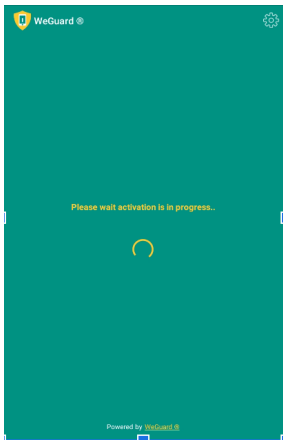

- In the next step, click 'Accept & Continue'.

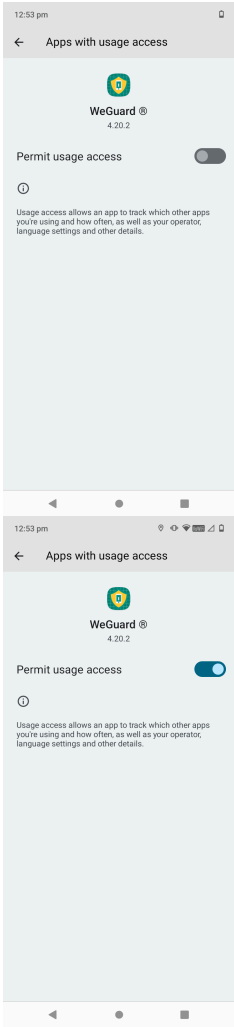

- Next click on 'More' and 'Accept' for google services.

- Next you see the WeGuard activation page.

- Next Toggle ON the usage access.

- Lastly, you can now see that the device has been enrolled with WeGuard and has the settings, Apps installed as per the policy.

We hope this article was useful. Thank you for reading.
