

# How to disable Volume buttons in Android Devices?

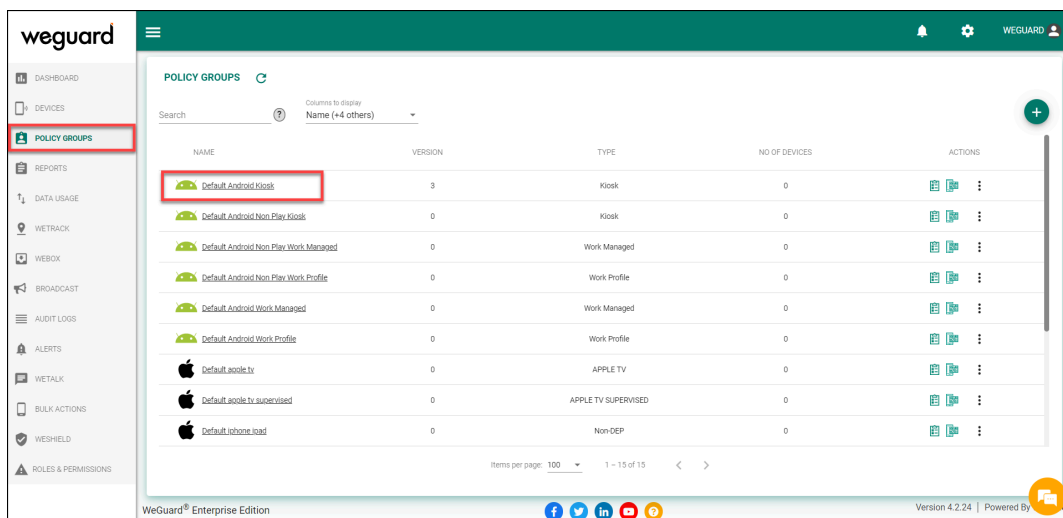

Blocking volume buttons might be done for various reasons, such as preventing accidental presses, childproofing the device, or ensuring uninterrupted operation in specific scenarios. Complex actions like entering safe mode or performing hard resets require specific button combinations. The administrators can either enable or disable the volume buttons based on their requirements.

## Pre-requisites

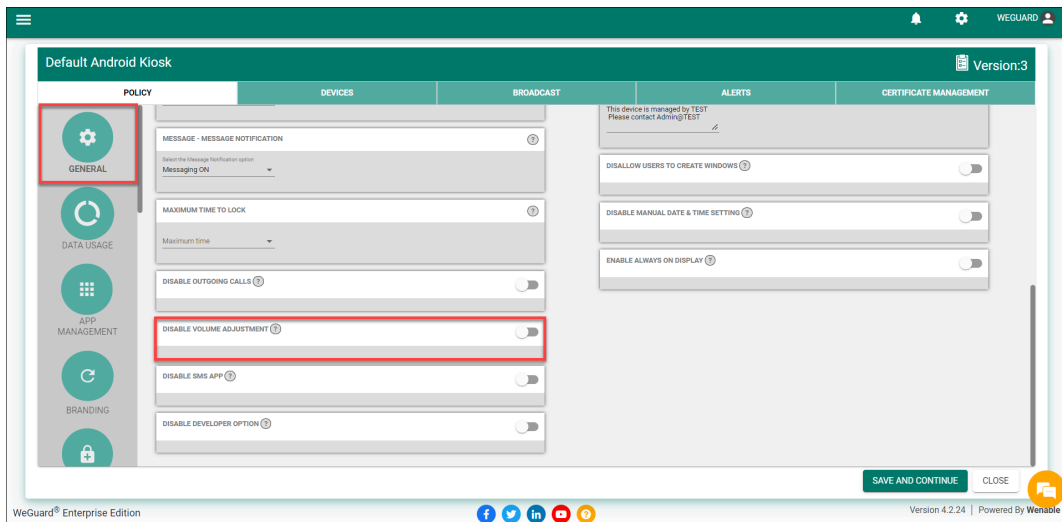

Android devices must be running Android 6.0 or later versions and must be provisioned as Device Owner

## Process for disabling Volume button through the WeGuard Enterprise Portal

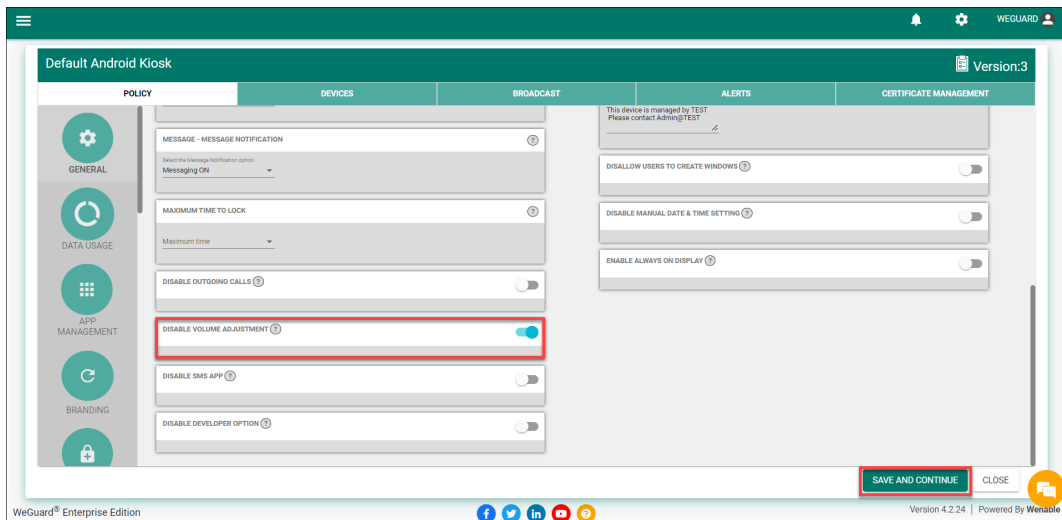

- Login to the WeGuard [Console](#).
- Click on **Policy Groups** and choose the **Policy**.

- Go to **General**, and find **DISABLE VOLUME ADJUSTMENT**.

- Toggle it **ON** and click on the **SAVE AND CONTINUE** to impose the policy on devices.

Note: The end user will not be able to perform any actions with the volume buttons.
